Primary – 1<sup>st</sup> –3<sup>rd</sup> grades

**How to use the chart:**

Use at home for home schooling, in Bible class or just for fun with your children.

This chart is for reviewing the days of creation (1-6). After you have studied the things GOD created on each day – cut out pictures from magazines, etc. of things GOD created. Make sure there are enough pictures that each student can have at least one picture for each day of creation. Make copies of the chart above – one for each student. Let each student glue a picture in the squares on their sheet to represent what was made that day.

If you need visuals for each day as you study the creation:

Cut a piece of poster board in 1/4s – cut out pictures to represent the day you are studying. As a readiness activity let students use pictures to make a mural on one piece of the poster board. Use the mural as a visual and hang it on the wall for reviewing at a later time.
